# World of Jolly

## **Crafting masterpieces that are an amalgamation of innovation and quality.**

Our's is a name etched in the hardware history of the country! Jolly has, for more than 78 years, worked relentlessly to ensure that every industrious foundation set in the country is crafted with impugnable quality. Furthermore, in tandem with our commitment to you, we offer the widest selection of premium finishes that add flare and sophistication with their looks, to all genres of interiors.

Jolly's commitment through the decades has been to be the industry pioneer that introduces you to the gold standards of hardware recognized globally. Aligned with this vision, we at Jolly constantly endeavor to bring to you hardware and fittings which are the most optimal amalgamation of product innovation, design, and technology. Presenting to you our pride and labor.

# Cronos

Mortice Handle

A handle opens up  
another world.

## Our Vision

Jolly Engineering Works has always been known as the most preferred builder's hardware brand in the country. We are determined to continue to be worthy of that title by ensuring premium quality at competitive prices. We constantly reform ourselves with changing times and grow steadily to meet our client's expectations, in all thoroughness that we participate in.

## Our Mission

With a combination of futuristic vision and hard work, we aim to achieve perfection in our products. With the use of cutting edge technology that personifies innovations, we are determined to provide our clients with best quality money can buy. Our objective is to build strong and lasting customer relations by making their experience with us, a good one.

### Standards & Approvals

#### Our products abide by the following standards:

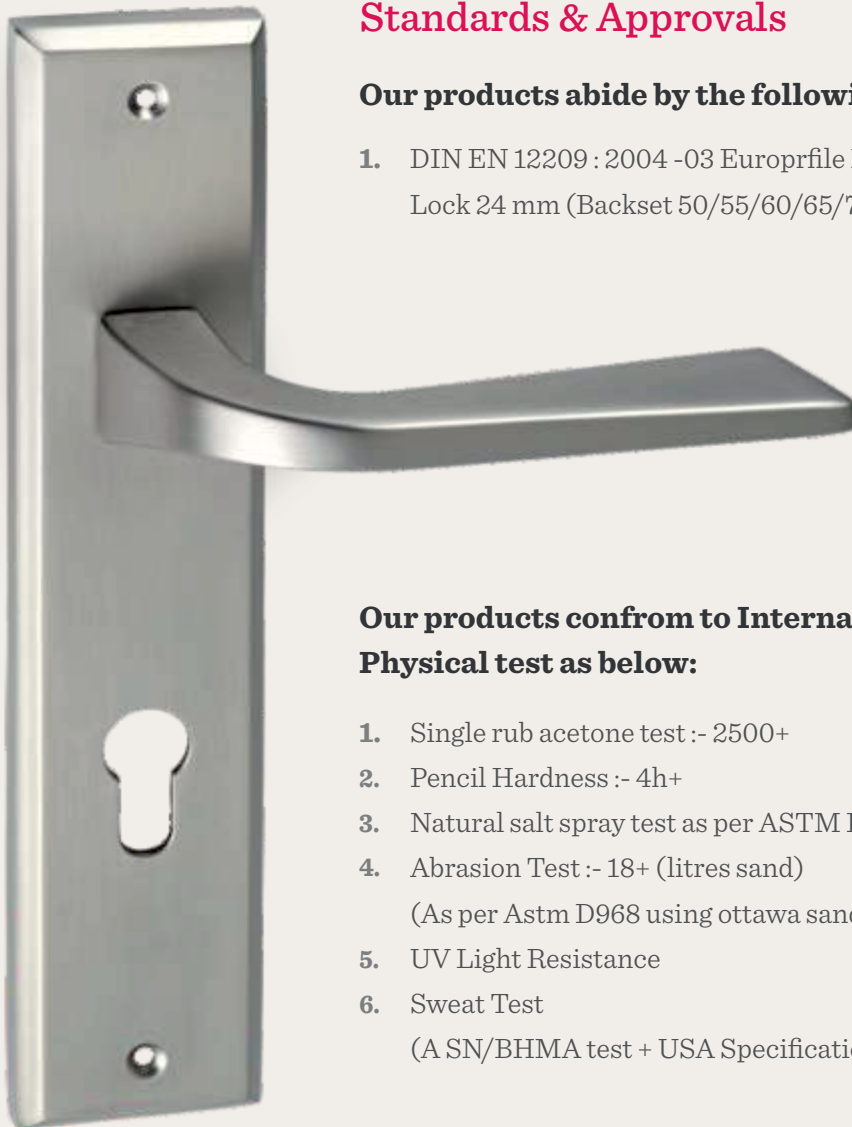

1. DIN EN 12209 : 2004 -03 Europrofile Mortise  
Lock 24 mm (Backset 50/55/60/65/70mm)

#### Classification:

3H700E6PC10

#### Our products conform to International Chemical and Physical test as below:

1. Single rub acetone test :- 2500+
2. Pencil Hardness :- 4h+
3. Natural salt spray test as per ASTM B117 - 500Hrs. +
4. Abrasion Test :- 18+ (litres sand)  
(As per Astm D968 using ottawa sand)
5. UV Light Resistance
6. Sweat Test  
(A SN/BHMA test + USA Specification) 4+

### Available Finishes (Anti-Bacterial)

Matt SS, Antique Brass, Raven Black

### Other Finishes

PVD Gold, PVD Rose Gold

The Lugano handle is treated with certified antibacterial coatings: the technology has been tested & engineered with thin films that maintain the aesthetic value of the handle.

These special films guarantee long lasting performance and anti-scratch performance together with exceptional bactericidal properties that nano-technology can offer, tested and certified in the laboratory: a unique treatment to completely block the development of bacteria and to eliminate them.

This solution is ideal specifically for public spaces, where the number of contacts and interaction with objects and door handles is frequent.

### **Can Antibacterial help fight Covid-19?**

In addition to the Antibacterial effects, anti-viral effectiveness is also proven. It is known that viruses need a host cell in order to survive on surfaces. The cells on surfaces that allow viruses to remain active over time in widespread manner are the bacteria themselves.

# Modena

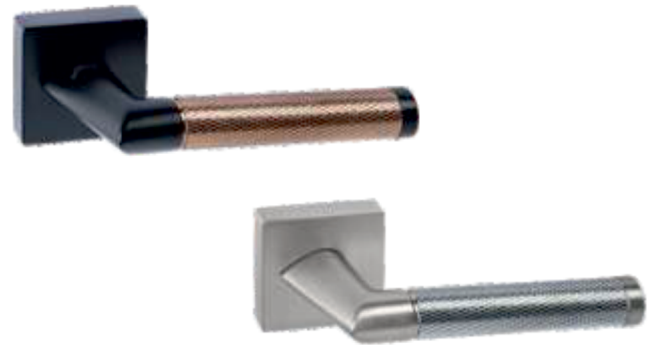

## Mortice Handle

Enhance your exquisite artwork  
with our glamorous handles.

# Shade

## Mortice Handle

The Shade Handle defines geometric perfection with its clean lines and edges. The neat beveled edges of the handle have been designed to give you a comfortable yet firm grip. It's eye catching design which is ideal to highlight interiors with modern or classic aesthetics, is what makes it truly versatile.

# Handle Crafting Process at Jolly

A behind the scenes peek into how Jolly's masterpieces are crafted.

## Design

1

The idea for a new design first takes form on paper with a detailed graphic blueprint of its design and function.

## 3D Design/ Rendering

2

A 3D design blueprint is created using design software.

## Plastic Print/ 3D Print

3

The design is 'printed' using a 3D printer to make a plastic model of the concept.

## Wooden Model

4

The idea for a new design first takes form on paper with a detailed graphic blueprint of its design and function.

## Die-casting tools are made

5

From this wooden shape, the mould or die-cast for the handle is custom made.

## Forging The Shape

The raw metal is then forged into the ideal shape of the handle and base.

6

## Trimming The Handle

The rough looking metal parts are then trimmed for a better finish. This is where different finishes such as Satin or Matt are achieved.

7

## Grinding

In this step, all the excess oxidation is removed through vigorous grinding.

8

## Polishing

In this step, the nearly finished handle is polished for the brightest finish.

9

## Coating

Depending on the desired effect, PVD coating or other coating is done on the handle to create a stunning result.

10

## Quality Testing

In this step, selected Jolly handles undergo rigorous saltwater testing to ensure its high quality and durability.

11

# Grip

## Mortice Handles

The angular grip handle boasts a sleek design and comes in a range of finishes. Its smooth texture ensures a comfortable grip, and its optimized mechanism allows for effortless operation. This handle is perfect for contemporary homes.
