MARFIL
TILES ◆◆◆

N A R R A T I V E

Marfil is a manufacturer of high-quality FULL BODY VITRIFIED TILES for both residential and commercial applications. We want to make an architect's vision a reality. Marfil, a major tile producer in India, specialises in high-end vitrified tiles of worldwide standards. Marfil has been a leader in the production of FULL BODY VITRIFIED TILES for over 18 Years.

Marfil has an everyday production capacity of over 15,120 sq. mtr. of tiles, thanks to our state-of-the-art manufacturing site in Morbi, Gujarat. Our production operations are well-supported by a specialised R&D centre that maintains us on the cutting edge of technology.

15mm
600x600mm

The best technical performance of any product, 15mm complete body tiles are suitable for outdoor settings and have no chance of breaking. It allows for solutions that offer a seamless transition between indoor and outdoor areas. It's frost and thermal shock resistant, has excellent anti-slip properties, keeps its texture and colour over time, and is simple to clean. The ideal combination of aesthetic quality and high technological performance, ensuring infinite durability.

NEW DIMENSIONS

We create high-quality full-body surfaces with outstanding finishes that accurately reflect product aesthetics. In terms of the fineness of details and the range of solutions, the finishes and surface treatments are one-of-a-kind, always classic and unique.

COLOUR

THE FINEST CHOICE TO MAKE THE LONGEST BEAUTIFUL LIFESTYLE

We are introducing a concept of architectural surfaces from our experience of 18 year in manufacturing with the sizes of 600x600mm, 600x1200mm and 800x1600mm that goes beyond traditional ceramics: it allows designers to reinvent design criteria, giving them the utmost freedom and minimal constraints.

The lower weight of the individual tile is a logistical advantage for transportation and handling at the building site, and a practical advantage in special contexts, such as laying over existing surfaces, the shipping industry, and the field of furnishing.

DURABLE CHARACTER

GRAVEL / SAND

Installation with thin joints or joints without grass is recommended for larger areas.

GRASS

These dry-installation systems are very common in outdoor areas. Whether the tiles are to be laid on grass.

RAISED FLOORING

This method is a unique, simple, and attractive approach to close gaps around elevated floors.

SCREED

Screed is a coating of cement and sand applied to a concrete substrate and used to lay various types of flooring.

G R A P H I T E

This series design fits seamlessly into contemporary landscapes and architecture, with stylish aesthetics and a wide selection of finishes.
